**TESTIMONY SUMMARY  
OF KEN BAKER**

**Docket Nos. E-01345A-10-0394; E-01345A-12-0290;  
E-01933A-12-0296 and E-04204A-12-0297**

**May 31, 2013**

Ken Baker testifies in Direct Testimony, concerning the proposals put forth by both Arizona Public Service Company ("APS") and Tucson Electric Power Company ("TEP") as they relate to the treatment of Renewable Energy Credits ("RECs") and the obligations of both companies under the Renewable Energy Standard ("RES") rules concerning Distributed Energy ("DE").

Baker also endorses the portion of the APS proposal in which the utility would record and report the renewable generation for informational purposes only, as it would allow customers or system owners to retain the value of the RECs associated with their generation systems. Walmart also recommends that if the DE requirement of the RES is suspended, only a temporary waiver be granted.

Additionally, in Rebuttal Testimony, Baker testifies allowing the utility to report the generation for informational purposes only (and thereby preserving the value of the RECs associated with that system that are retained by the utility customer or owner of the system) should not create any issues with attributes associated with renewable energy production. Baker discusses the Green-e Energy National Standard provisions regarding impermissible double counting of RECs, including the comments filed by the Center for

Resource Solutions (the organization that adopted the Green-e Standard) expressing concerns with a waiver of the DE requirement that is dependent on renewable kWh generation by DE facilities.
